

*Your
Quality Time.*

THE PRIME TIME VAN

FOR THE BEST TIME OF YOUR LIFE

Creating something special for camper van enthusiasts was the goal behind the development of the new Eura Mobil Vans. Competence creates character: our Premium vans are for the most part hand-crafted in the new production facility set up especially for this new series.

In combination with modern engineering and a great deal of experience from our camper van specialists, we produce outstandingly practical and comfortable vans of individual class.

*WHEN SPECIAL
COUNTS ...*

VISIBLY DIFFERENT

In the new Premium van from Eura Mobil, the exclusive ambience transforms every moment into a special moment. Feel the fine materials and experience the individual details that make the Eura Mobil van your very own mobile home. Take your time and let the interior work its magic on you ...

+ **Skylight trims** made of soft eco-leather including LED lighting

+ **Interior-lit wall units** with shelves and ambient light

+ Easy-care and high-quality **fabric / eco-leather upholstery combination**

+ **Washroom** with 30mm thick door including handle in eco-leather

+ **Table** with folding top, cup holder and swivel extension

TANGIBLY DIFFERENT

"Cosy" is our customers' favourite term for the ambience in the Eura Mobil Van. Selected upholstery fabrics, a fleecy ceiling covering and textile wall coverings with eco-leather appliqués instead of bare plastic surfaces make the tangible difference. Feel it for yourself...

+ Fleecy "Smooth Touch" **ceiling covering** with LED ambient light on wall units

+ **Rear storage lockers** all around, on the sides with storage and LED reading spotlights with USB ports

+ Body-flush, insulated **windows** with mosquito screen

+ Textile **microfibre wall covering** with prefixed, back-lit window shades made of eco-leather

+ **Comfort cold foam mattresses** with split and therefore foldable bed frame

REFRESHINGLY DIFFERENT

In addition to the obvious differences, the Eura Mobil van can also impress with its hidden qualities. At the slightest touch of a hand, the washbasin and mirror cabinet swivel around together with the wall to reveal a "shower cubicle" with a comfortable floor space of 60x90cm. The retractable tap in the kitchen is just as cool. Discover the hidden possibilities ...

+ **Storage compartments**
even on the ceiling

+ **Large washbasin**
made from mineral material

+ **Numerous shelves** and shower fittings integrated in the wall

+ **Swivelling shower screen**

+ **Shower tray** 60 x 90cm for plenty of freedom of movement

EXCELLENT PRACTICALITY

Is "compact" a negative or positive term these days? It's what you make of it that counts, our designers thought ... and in the kitchen they show in exemplary fashion what counts: wide pull-outs with soft-stop retraction, the high-quality mineral worktop with integrated sink, "all from a single piece", and the outside storage compartment plus table anchorage for breakfast outdoors are just a few facets of this enjoyable kitchen centre. Try it out ...

+ **Elegant spice rack** with indirect lighting

+ **Retractable water tap**

+ **Worktop** made of one-piece moulded mineral material with integrated sink and foldable extension

+ **Side storage compartments** in the entrance area, including with bottle holder

+ **Extra-wide, sturdy metal pull-outs** with soft-stop retraction

CARE IN THE DETAIL

+ Elegant, transitionless corner connection with textile cover and integrated **loudspeaker**

+ High-quality **bi-colour wall unit flaps** with chrome-plated inlays and handle button lock

+ **Rear ventilation** to prevent condensation from accumulating in the wall units

+ Reading spotlights with **USB ports**

+ Shelf with integrated light strip for **LED ambient light**

The Eura Mobil vans have nothing to hide in the corners either. Precisely fitting moulded parts, a high-quality look and clever details characterise the interior fittings. No matter whether it is a matter of such elementary things as a powerful energy supply with the lithium-ion battery or such seemingly unimportant little things as upholstery seams: the functionality, installation location and choice of materials of the individual components have been selected with care. Compare ...

Storage compartments in the double floor

Optimum use of storage space: 3 storage compartments are installed in the seating group area alone: 1 pull-out, 1 folding compartment on the seat base and 1 floor storage compartment with handle eyelet

Water shut-off valves

Convenient operation: the drain valves for the water tanks are easily accessible and mounted in the heated and insulated interior floor. The gas shut-off taps are installed within easy reach in the kitchen unit.

Disc springs

First-class sleeping comfort: the mattresses are well ventilated on comfortable disc springs. The bed frames are divided and foldable, allowing variable use of the rear compartment.

Wall units

shapely and functional: the wall units impress with an elegant design. Solid metal spring uprights, chrome-plated handle buttons and contact-controlled interior lighting embody Eura Mobil's highly functional approach.

Table rail

Outdoor enjoyment: the table from the interior can also be hung on the outside rail on the kitchen unit for breakfast outdoors. Fine detail: for the rest of the day, the rail hides invisibly behind a hinged cover.

Panorama roof window

Close to the sky: the (optional) panoramic roof in the cab floods the interior with light. An interior frame with textile covering harmoniously blends the window into the interior.

Lithium-ion battery

Powerful self-sufficiency: the 100 Ah lithium-ion battery equipped with a charge booster has plenty of reserves. A real highlight included in even the standard scope of delivery!

TV cabling and USB ports

Thoughtful: two USB charging ports are installed at the top of the seating group in addition to the TV preparation. So you can conveniently charge your smartphones on the shelves under the wall units without the cables getting in the way.

Upholstery seam

The eye travels with you: the upholstery seams in a chic cross-stitch pattern are exemplary of the lovingly created design. The other textile finishes also create a harmonious and homely ambience.

Cup holder

Great functionality in miniature: the table insert with cup holder is a practical detail for travelling. And if anything ever spills, both the high-gloss table surface and the eco-leather window shade can be quickly cleaned.

STANDARD FEATURES

Top features:

- Lithium ion battery with charge booster
- Winter-proof according to EN 1646
- Washroom with swivelling shower screen
- Mineral kitchen worktop "from a single piece", with integrated sink, retractable tap and worktop extension
- Wall units with interior lighting

Basic vehicle

- Fiat Ducato 35L chassis, van
- Euro 6D Final incl. Ad Blue and soot particle filter
- Driver + passenger airbag
- ABS, ASR, Esp incl. Traction+, hill descent
- Manual air-conditioning system
- Cruise control
- Fuel tank, 90 litre
- Central locking with radio remote control
- Daytime running light
- Electric window risers at the front
- Cup holder
- Decorative wheel trims
- Fix & Go breakdown kit
- Rear bumper black

Body exterior

- Winter-proof according to EN 1646
- Sound and heat insulating roof, floor and sides
- Body colour white
- Body-flush frame windows, insulated, with quick-release fasteners
- Windows with mosquito screens and blackout (also in the rear doors?)
- Two side windows in the sleeping area (595HB: 1)
- Vent windows at the rear
- External lighting
- Electric step

Driver's cab

- Cab seat cover in living area upholstery fabric
- Carpet in the driver's cab
- Seamless, head-high passage to the driver's cab
- 2 map compartments above the doors
- 2 double reading lights
- Eco-leather trim with integrated LED ambient lights in the transition to the superstructure

Living space

- Ergonomically shaped dinette with rounded edges
- Folding table with swivel extension and chrome-plated table base
- Table top with cup holder
- Isofix seatbelt anchors in the bench seat
- Living room upholstery in eco-leather / fabric combination with decorative stitching
- Double floor storage compartments under seating group (1 pull-out, 1 folding compartment, 1 floor storage compartment)
- Wall units, rear-ventilated, with shelves and ambient lighting
- Interior lighting of the wall units automatically activate when opened
- "Beach Home" furniture décor

- Wardrobe with pull-out clothes rail
- Smooth Touch fleece covering on the ceiling
- Textile wall covering on the side walls
- Window frame and skylight trims in eco-leather
- Robust metal flap stand
- Chrome-plated cabinet locks with handle button
- LED functional and ambient lighting
- USB ports and TV preparation at the seating group

Kitchen

- Single-piece mineral worktop with integrated sink and foldable worktop extension
- Pull-out / retractable kitchen tap
- Wide pull-outs with soft-close function
- Two-burner gas cooker with cover
- Gas shut-off taps centrally located in the kitchen unit
- Compressor refrigerator with 90-litre volume
- Spice rack with acrylic glass rail and indirect lighting
- Ambient lighting on the kitchen unit and wall unit
- 2 flap compartments in the entrance area, 1 with bottle holder
- 1 pull-out in the kitchen unit accessible from the outside
- Table rail for suspending the dinette table, with folding cover panel

Bathroom

- Washroom with swivelling "easy-open" shower screen
- Shower space with up to 60x90cm floor space
- Wooden shower grate
- Large mineral washbasin with Click-Clack anti-odour trap
- Storage compartments in the wall unit, shower wall and wall panelling
- Mirror cabinet
- Hinged, 3 cm-thick room door
- Door handle with exclusive eco-leather wrapping
- Cassette toilet
- Washroom window with mosquito screen and blackout

Sleeping area

- Rear beds with disc springs and cold foam comfort mattresses
- Rear beds can be set up for variable loading area
- On Model 635 EB modular storage boxes under the beds
- On Model 635 HB drive-on ramp and load compartment cover made of metal
- Overhead storage cupboards with shelves, back-ventilated and

EQUIPMENT PACKAGES

illuminated

- Fabric-covered corner connector modules with integrated loudspeakers on the rear cabinets
- Midi Heki roof hatch above sleeping area
- 2 side windows (635HB: 1) with backlit window frame and skylight trims in eco-leather
- Swivelling LED reading spotlights with USB ports
- Rear doors with fabric covering and opening windows

Installation

- Heater Combi 4KW Diesel
- Hot water supply with single-lever mixer tap
- Pressurised water pump
- Heated and insulated fresh water tank in the interior
- Heated waste water tank underfloor
- Water drainage taps frost-proof in interior floor compartment
- Gas box in rear storage compartment

Electrical supply

- Lithium-ion living space battery 100 Ah
- 230V sockets in kitchen, seating area and bathroom
- Function light and ambient lighting can be switched separately
- TV preparation and 12V socket in seating group
- 2 USB ports each in living room and sleeping area
- Disconnecter for starter and living area battery
- Electric automatic charger for body / vehicle battery
- CEE external connection for 230 V with automatic circuit breaker
- Ground fault circuit interrupter
- On-board control panel with indication of all important functions above the entrance
- CP+ heating control incl. crash sensor

Design package

Fog lights
Black radiator grille
16" aluminium rims

Driving assistance package

Emergency braking assistant
Lane departure assistant
Rain and light sensor
High beam assistant
Traffic sign recognition

Chassis package

DAB preparation
Painted bumper
Electrically adjustable exterior mirrors
Electrical retraction of exterior mirrors
Captain Chair seats

Prestige Package

Multimedia preparation (radio preparation with steering wheel controls and reversing camera)
Automatic air conditioning
Steering wheel and gearshift knob in leather
Inductive charging station

Mondial package

Chassis package
Design package
Midi-Heki skylight
140 HP engine
Roof - "Sun Roof" panoramic plastic roof
Manual blackout system
Mesh screen for cabin door
Solar system

V 595 HB

All of the information in this brochure relates to the products listed herein and does not apply to any other products of Eura Mobil GmbH. The models illustrated in this brochure show the features available in Germany. They may also contain optional equipment and accessories that are not included with the standard scope of delivery. All weights quoted are values with a fluctuation limit of +/- 5 per cent. Due to legal regulations, differences from the model variations described here and equipment featured may be necessary in certain countries. Please ask your Eura Mobil dealer about the exact scope and range available of model-specific and model-neutral features. Subject to errors and changes in design, equipment and optional equipment. The publication of this brochure renders all previous catalogues invalid.

General information regarding the weight situation in motor homes

Special features (additional features) increase the weight in the vehicle's ready-to-drive state and reduce the cargo capacity. The weight of the additional equipment is detailed in our brochure information or your dealer / seller can tell you. The maximum number of persons permitted depends on the weight and axle load. It can be reduced if optional equipment (= special equipment / additional equipment) and accessories are installed, so in the interests of cargo loading capacity certain seats cannot be used. If all seats are to be used, some cargo capacity may need to be foregone. The technically permissible overall weight and axle loads must not be exceeded. The cargo loading capacity reduces with the installation of special features (= special equipment / additional equipment) and accessories. The cargo loading capacity is also not only dependent on the weight in the vehicle's ready-to-drive state, the actual vehicle weight, the weight of the accessories and the technical permissible overall weight, but also on the respective axle loads. The only way to achieve the highest possible payload supported by the vehicle's technology is to have a corresponding, axle-load-dependent load distribution.

Unless otherwise regulated, weight in ready-to-drive state as per Article 2 (4a) Regulation (EU) 1230/2012 is defined as: Vehicle dimensions with standard equipment according to manufacturer specifications (incl. vehicle tool kit)

- + fuel tank 90% filled
- + 75 kg (weight of the driver)
- + fluid gas bottle (filling capacity of 11 kg) made of aluminium filled to 100% (equals 18 kg in total)
- + fresh water tank filled to 100% in drive position (capacity of the fresh water tank is limited to 25 litres of fresh water in ready-to-drive state, where technically feasible*)
- + toilet flushing tank filled to 100%
- + fresh water heater filled to 100% = dimensions in ready-to-drive state

* marked capacity of the fresh water tank pursuant to appendix V. Part A (2.6 Fn). (h) Regulation (EU) 1230/2012 is limited to 25 litres by an overflow valve (recommended filling for driving), depending on the vehicle model

The technically permissible overall weight according to Article 2 (7) Regulation (EU) 1230/2012 is defined as: The vehicle's maximum weight when loaded as provided by the manufacturer.

Pursuant to the information provided in the catalogue, the maximum cargo loading capacity is defined as: Technically permissible overall weight – Dimensions in ready-to-drive state = maximum cargo loading capacity.
